If you're still getting the bug on your Android 4.4 phone, please restart the app. Otherwise it might work fine for you. App Reviews jared Windows Phone 8.1 It is one of the best apps I have, it's easy to use and I really don't know how to use any different apps unless I have to. I just wish for some more options of getting my position in the app I could edit. StuartC Windows Phone 8.1 very good program but wish it could download historical values from popular bond and stock markets which are unlikely to be available in other apps. Instead of having to manually input historical values and remove them manually it would be very nice to get these historical bond and stock market values free via the app. Deborahce Windows Phone 8.1 It does what it says on the box, and I would not change it if I were you. But I still need something beyond what it is - a StockWatch equivalent
