iFX HD 2011 is a lightweight Windows application built specifically for helping you play video files and listen to your favorite songs in a clean and intuitive working environment. The layout is intuitive enough to be configured without having to consult a help manual or watch online tutorials. iFX HD 2011 offers support for the following file formats: AVI, WMV, MPEG, WMA, and MP3. The program gives you the possibility to upload files into the working environment using the built-in browse function, so you cannot rely on "drag and drop" operations. When it comes to the audio rendering process, you are allowed to play or pause the current audio selection, adjust the volume, as well as go to the previous or next song. What's more, you can seek for a position in the video streams, play or pause the current clip, alter the volume, adjust the speed, zoom in out, and switch to a full-screen mode for a better focus on your work. Last but not least, you can create playlists, upload data from a file, save the playlist, as well as add the content of an entire folder to the current playlist. During our testing, we have noticed that iFX HD 2011 carries out a task quickly and without errors. It is quite friendly with system resources, so it doesn't hamper system performance. To sum things up, iFX HD 2011 seems to be the right choice in case you are looking for a simple-to-use media player that comes packed with basic functions. It could be a great starting point for helping rookies get used to working with a media player.Consumers are becoming more comfortable with the idea of allowing their kids to play with the new Nintendo Wii U, according to Ubisoft CEO Yves Guillemot. Nintendo sold around 6.6 million Wii U consoles worldwide, with the game publisher currently predicting that the console could sell 10 million in 2013. Despite the fact that Nintendo's Wii U debuted in 2012, Guillemot said that demand for the console hasn't fallen off, despite the fact that the Wii U's games are launching at a later time. "We're seeing steady demand, with some stronger points," Guillemot said. "I'm not surprised we're seeing higher demand.... There is a natural trend of people becoming comfortable. You have to consider that there was a huge attention given to the Wii. People had already bought it. People were accustomed
