But what if you can't afford Photoshop? Never fear! You can use the following programs instead. Tutorials Even though Photoshop is a powerful tool, editing photographs can be as simple as creating a new layer and choosing an adjustment layer (as described in the upcoming sections). Creating simple web graphics is as easy as cutting the right shape out of a picture and pasting it into a background graphic. You can create a new layer with any picture editor. Any windows image viewer can display layers, so it doesn't matter what program you use. Although Photoshop is the most common choice, you can use a variety of different programs. Not all image editors have layers, so if you're not sure what you're doing, a program that isn't intended for creating layers might not work right.

- **Mosaic:** Mosaic is a free image editing program that you can download from the Internet ([www.luminis.com](http://www.luminis.com)). The program makes it easy to cut out and reassemble images. Select the layer you want to cut out of the image, press Ctrl+C (⌘-C), then press Ctrl+V (⌘-V) to paste the image. The image will be placed in the background of the layer, and you can add layers to the image to create your own mosaic design. Mosaic comes with a variety of different background options that you can choose from.
- **GIMP:** GIMP is a popular free image editing program that you can find at [www.gimp.org](http://www.gimp.org). Its features are similar to those in Photoshop and Macromedia Dreamweaver, as well as those in programs such as Adobe Illustrator. GIMP includes many tools that are similar to those in Photoshop, and you can use the program to cut out images and edit them for your web designs.
- **Photoshop Elements:** Photoshop Elements is a free downloadable image editing tool that you can find at [www.adobe.com/products/photoshopel/index.html](http://www.adobe.com/products/photoshopel/index.html). A portable version is available as well. If you are looking for a small and simple image editing program that doesn't cost any money, Photoshop Elements is a great choice. It's available in both CD and DVD formats.
- **Any image editor:** You can use any image editor to create new layers, do image editing, and create web graphics. Just remember that most editors aren't as powerful as Photoshop or Photoshop Elements, and you may be limited in what you can

Of all the problems affecting the quality of life for millions of Americans, tobacco use ranks as one of the most frequent and persistent. This study examines its consequences in a long-term, prospective, population-based design. Data come from the National Health Interview Survey, 1976-1994. Monthly waves of data are pooled to form a panel dataset. Measures from earlier waves are omitted, and a general statistical model is used to compare the "quitters" in terms of their health and economic outcomes. The analysis shows that there are substantial benefits to quitting, and that quitting is more beneficial for those with long-term use than for those with short-term use. Quitting for life has more benefits than quitting for a few years. The results are robust to both the exclusion of the unemployed, and to the exclusion of smokers' health problems, as long as the data are restricted to noninstitutionalized persons.

Psalm 137 Psalm 137 (, lit. "By the rivers of Babylon") is the 137th psalm of the Book of Psalms. It is composed in Hebrew and is a regular part of Jewish, Protestant, and Catholic liturgical books.

Police on Tuesday searched an office belonging to Republican U.S. Senate candidate Roy Moore in Jackson, Ala., in connection with a report alleging he initiated a sexual encounter with a 14-year-old girl when he was 32. The state's election board said it was "looking into the allegations that there was inappropriate conduct with 14-year-old girls." A subsequent inquiry by the FBI was halted by the Justice Department on Aug. 21, after Moore said he would retire as the party's nominee, though he said he would continue to fight the allegations. The Washington Post reported in a bombshell report on Tuesday that a woman said Moore initiated sexual activity with her when she was 14 and he was 32. "I am appalled that these abusive allegations are being made against our honest and honorable Prime Minister," the Indian government told the BBC. "I would urge the media to desist from any attempt to malign India's reputation," the statement read. But the UK's envoy to the National Democratic Alliance in New Delhi, Karen Pierce, said that there is "no reason to doubt that his allegations are true." In a statement on Tuesday, the British Department of International Development said that it had suspended funding to any of his organizations. "This is a very concerning allegation against Mr Moore and we have therefore suspended funding for one of his organizations. Mr Moore is an independent chair of the Global Partnership for Education (GPE) and the Global Education First and we have been informed that he has invited the Minister for Women and Equalities for a meeting to discuss this matter," the statement said. "As these are allegations against a Member of Parliament we will be sending an official letter seeking further information," the statement continued. "We look forward to the Prime Minister and his Deputy providing us with the assurances we have requested." The New York Times said it had obtained a copy of a letter from the U.S. Senate outlining a 2001 order by Moore to a lawyer to pay a fine related to molesting a 14-year-old girl. Moore's press secretary, Bill Armistead, told the Times that the senator was not aware of the order until Tuesday. The order, signed by a probate court official, called for Moore to pay a fine of \$1,000 and perform one hour of community service, according to the report. Moore was a local judge at the time and was reelected in 2012, Armistead said
