With AutoCAD, users can create their own symbols, such as architrave and moulding. These symbols can be displayed on a drawing with the help of the drawing's annotation feature. AutoCAD also allows users to create their own documentation and data using the editing feature. AutoCAD has a powerful set of tools for measuring, standardizing, and dimensioning which are used to define and generate paper dimension, millimeter, and inch and fractional-inch dimension symbols on a sheet of paper for accuracy and compliance purposes. The capability of the Application Programming Interface (API) of AutoCAD is also utilized in the drafting field. AutoCAD is used by architects, engineers, contractors, carpenters, and surveyors in the construction, engineering, and surveying fields. AutoCAD is one of the most popular and widely used CAD packages in the world. The following release dates are of important AutoCAD releases. These tables give major release dates by year for AutoCAD. AutoCAD was introduced on December 22, 1982, with its first release, "AutoCAD 1.0". VBA This is a scripting language developed for Microsoft Office. VBA applications are limited to macros in Microsoft Word and other Office applications. AutoCAD supports import and export of VBA macros to and from Microsoft Excel. Other applications can be used to call VBA macros. Visual Basic Another scripting language, Visual Basic is a modification of the Visual Basic 6 (VB6) programming language. A user interface (GUI) is provided to make it easy for a user to build and modify the design of a model. It is used in conjunction with another programming language, such as Visual LISP or AutoLISP, for creation of applications that run within AutoCAD. Visual Basic is a popular programming language for building controls, forms and macros in AutoCAD. Visual Basic programs, called VBA applications, can be built in AutoCAD or used as extensions to AutoCAD. SQL SQL (Structured Query Language) is a simple programming language that has been used for years to access database management systems (DBMS). The standard is de facto and has been developed by the International Organization for Standardization ISO/IEC 9075 and ISO/IEC 15892. SQL supports structured query languages. The World Wide Web Consortium (W3C) has used SQL as the standard programming language for web-based database queries. SQL Server is a relational database management system (RDBMS) that is a prominent database management system (DBMS) for Microsoft Windows that supports a variety of programming languages including Visual Basic, C, C++, C#, Java, and T-SQL. Other server-based database management systems such as Oracle and MySQL are available. Other AutoCAD also supports XML for data exchange. XML is the de facto standard interchange format for electronic data interchange. For a more detailed discussion of the data exchange technologies used in AutoCAD, please see our Data Exchange topic. Kate 'n' K9: Dave & Charlie Get Puppy Our dogs are the first things we notice when we come home, but they're also the first things our guests see when they come over. Kate 'n' K9 for my new magazine's first Christmas cover feature was a fantastic opportunity to create a puppy photo shoot for my new magazine's first Christmas cover. Dave and Charlie, two four year old, Staffordshire Bull Terriers have been my boys since they were a puppy. They were both born in the hospital with me, so they've always had me around for comfort and company. When Dave was about to turn six years old we decided to get him a sister for Dave, and a little brother for Charlie. After searching for the perfect breed, we chose to get two Jack Russell puppies, because we wanted some longevity in them. A local puppy rescue offered to take the two puppies we wanted and said they'd be more than happy to deliver. Luckily, their cocker spaniel sister, Em, who is one year old was around the house. A perfect match. Em and Katie are both so sweet. The photo shoot was so much fun. We had to keep the shoot very simple. The dogs' personalities shine through. Dave is loving and affectionate, but he's also very naughty, and Charlie is rather aloof, but once you get to know him, he's so lovely. I had to keep their moods in check while I was working, so it was so important to work closely with the puppies and follow their lead. I wanted them to know that the photographer was their friend and loved them and didn't mind them being around, so I encouraged them to get to know her and allow her to be their friend. The shoot was done in natural light, and all of the light came from the four foot long open window and the sun streaming in through the white curtains and blinds. It was such a great opportunity to get some beautiful photos of the dogs, just being puppies, and I'm so happy with the final images. Want to see some of them in your Christmas cards? I'd love to
