Official Lenovo Vibe X3 Lite K51c78 Stock Rom

This is Official Lenovo Vibe X3 Lite K51c78 firmware, do not update your rom. here is Lenovo Vibe X3 Lite K51c78 firmware, . How to Install a ROM on a Lenovo Vibe X3 Lite?. HTC One . Support Lenovo Droid Kernel. flash this file in order to flash new factory rom . Lenovo Vibe X3 Lite K51C78 4.5" Quad Core FHD. Changelog for Vibe X3 Lite 2.10 ª 16 MAR 2015. Hi, I'm using the K51C78 kernel and I would like to run the fslover Firmware and ROM from the K51C78.Q: Copy object from array gives undefined I am trying to copy an object from an array but I am getting the undefined error. Here is my code: game.user.forEach(function (user) { user.admissions = []; game.user[0].admissions.push(user); }); A: Since game is undefined in forEach method, it will always have only one element. Use map method instead which iterates through all the array you want. Or simply use reduce. game.user.map(function(user){ user.admissions.push(user); }): You can use reduce function to take an

---

```
action for each elements of the array. var user = { "admissions": [{ "age": "14", "score": 16 }, { "age": "16", "score": 17 }, { "age": "20", "score": 14 }, { "age": "18", "score": 19 }] }; var newUser = { "admissions": [] }; user.admissions d0c515b9f4
```

Featured. 1 2 3 4 5. Firmware. How to  
Download and Install Lollipop, Marshmallow  
and other Android OS On Lenovo Vibe K51c78  
10th June 2018. The following tutorial explains  
how to install android os on Lenovo Vibe X3 by  
using PDA Flash Toolbox.Q: How to get image  
from gallery and display it as a button in  
Android application? In my application I have

a custom view class that is like:

```
public class  
ImageView extends View { private int mResId;  
    private Context mContext; public  
    ImageView(Context context) { this(context,  
        null); } public ImageView(Context context,  
        AttributeSet attrs) { this(context, attrs, 0); }  
    public ImageView(Context context,  
        AttributeSet attrs, int defStyle) {  
        super(context, attrs, defStyle); this.mResId =
```

---

```
 attrs.getAttributeResourceValue(null, "res-id",
    0); this.mContext = context; } public int
        getDrawableResourceld() { return
    this.mResId; } @Override protected void
        onDraw(Canvas canvas) {
super.onDraw(canvas); this.draw(canvas); } }
```

and in my activity I do something like:  
    ImageView iv = new ImageView(this);  
    iv.setImageResource(R.drawable.xxx);  
setContentView(iv); My question is, what's the  
best way to do it? In particular, I have a  
gallery of images and I'd like to
