The playing area is in the center of the table and the nine cards are displayed in the table bottom center. During each round a dealer(?) rotates clockwise. Gameplay: 1. Each player will get a starting hand of five cards from the deal deck. 2. Players will play their starting hands one at a time from left to right. 3. AFAIK, it is only in the jap version, not in the english version. I have not found anything on the net. I've just managed to find something in the official forums of Factorio, who noticed it before I did, and tried to find out something on it, but they were not able to find anything. Can I assume then, that there are at least two different packages then? Maybe not. We really have no idea what the mods at Steam do or do not contain. We used to have an app on our page that would display a list of all the mods on Steam and when we've updated it in the past, we've always noticed one or two mods but not all the mods. And the PS4 Mods page doesn't have anything for PS4 there. These things are always changing. EDIT: Just found that there is a thread in Steam for the same thing.
