---------------------------------------- Qwad Crack is a graphical wrapper around the wadtool library. It allows you to create wads from multiple folders on your SD card, download titles from Nintendo's UMD Shop, decrypt their contents and even update/patch games. It has tons of features: you can unpack a wad file from a folder, or retrieve a wad from Nintendo's UMD Shop and search titles and search for them on the internet, select multiple wad files, rename them, merge them into one wad or pack them into a WAD. To top it all up, you can also choose between uncompressed wads or an AVI compression. If that's not enough, you can even specify a custom firmware and hack away! Qwad Download With Full Crack 2.0 (with SSL support) was released on the 1st of June 2011. Qwad Supports: ------------------------------------------- * Wii * 3DS * GBA * DS * GBC * Gameboy Colour * Gameboy Advance * Gameboy Wonders *

QWAD is a graphical wad tool which allows you to unpack wads and create wads from folders. Download titles from NUS (and packing them into WADs) and decrypt their contents. Qwad's primary goal is to add features which are missing in most other wad tools. Hopefully that's going to be accomplished in the near future. Currently the tool's most useful features are: * Packing into wads (with various compression levels and encryption options) * Unpacking from wads (with compression levels and encryption options) * Searching wads for their contents (with compression levels and encryption options) QWAD Layout: QWAD is a graphical wad tool which allows you to unpack wads and create wads from folders. Qwad is developped using GTK+ 2.24.7. It allows you to search for wads and to upload and download wads from NUS. When your Unpack-Todo is complete, you may then proceed to setup a compression or encryption levels and button QWAD's -[FileSave|Edit|URL]- menu. And you can save your configuration as a file (and activate it later from a script using the QWAD -command-). If you wish to be notified when new

versions are available, select the "Subscribe me" button in the "Preferences" window. The message system is based on the Gnote application. The notifications will be sent to your desktop. Please note that Qwad is still under developpement and may contain bugs in the user interface. If you wish to report a bug, open a ticket on the QWAD project site or enter a bug report on the freeware tracker at Report bugs, add feature requests, do questions to the qwad mailing list, or contribute to the project by: * reporting bugs ( * submitting bug reports ( * adding feature requests ( or * contributing code (
