Optimization from <http://matlabR2011aLicenseStandaloneDatDownload> Â·OTTAWA—Bill Morneau has a long memory. Following several days on the water, including a ride in the Pacific Ocean aboard a Quebec  
oceanographic vessel, the finance minister is taking his Sunday reading with his guidebook: Classics of Modern Economics. “Economics: a discipline of thought, a method of inquiry and analysis, developed chiefly by  
the Scottish economist Adam Smith in the 18th century, and concerned with the allocation of scarce resources and production,” begins the opening page. Morneau, who grew up in Québec before moving to Calgary  
to become a geologist, has been a reader of Thomas Piketty’s popular book on inequality, “Capital in the Twenty-First Century.” “When I was looking at his book and his thesis, I recognized that it applied to Canada.  
Canadians now recognize it, too,” he said. “But it was very good to know that sort of a way of thinking about things, of seeing the world through this lens.” Economics is also a lens through which Canadians are  
grappling with the arguments about the potential benefits and drawbacks of economic and fiscal policy — the equivalent, really, of politics. The Scottish-born French economist himself, Smith wrote his classic “The  
Wealth of Nations” in 1776. It’s the equivalent of the Bible for economic thinkers. It’s also long been a bible for progressive economists around the world — a handy lens through which to understand society. Piketty,  
who died in August, has spent decades arguing governments must look closely at capital flows because they can drive inequality. A small portion of all wealth, held by relatively few people, is being hoarded, he  
believes, and the accumulation of wealth is outstripping the rate of growth. “ 6d1f23a050
