I also have another blog that is posted at http://blog.hindsight.org.au that is about the Hack:Enable version of the Facebook iPhone application. I will try and put this blog on there when it is updated. In fact, Facebook Messenger is one of the most famous

Facebook app on iOS. When we develop software, we should follow a standard so that it can be compatible with all the operating systems. You can see many facebook apps are not designed to the iOS system. They have plenty of users to use the Facebook messenger. Especially, the Facebook messenger for iPhone, iPad has a very large number of users; even though there are much than one billion people using Facebook, only less than half of them have an iPhone. To sum up, the company Facebook wants to make sure that their Facebook messenger is compatible with all the iPhone. So, iOS apps can be used on other operating system and operating system apps can be used on other operating system.

Excellent point. The ipa file is basically the game/app which you download, it is portable through iTunes. All of the files come when you press install. You may want to keep iTunes open in case you get an error. There are certain rights that you can use when adding the ipa file. Once you have run the app it will ask you to log in to your Facebook or Twitter account. You will also be asked if you would like to save your username and password. Just accept those options and you are ready to play. Yes, once you jailbreak your phone, you have access to so many apps and games for free. There are so many sites which offer free apps, games, etc for jailbroken phones. Most of these sites are run on themes of Windows, so the app download may seem a bit different to if you're using a Mac. You can now use FireSheep to create a Web proxy to use to

browse the web as the infected user, and then browse the infected machine while browsing the internet. After you have downloaded the software, you run it, but will need to change some settings. You need to do this from the infected computer. Hi, I am able to install the Facebook Messenger IPA 6.1.1 on my iPhone 4s, iOS 7.0.4.
