(or, as roxio calls it, "an installer program".) it's also used to install the roxio suite, a suite that includes several different programs. for example, when you install roxio creator, you also install roxio creator for the first time, roxio creator dvd maker, roxio label maker, roxio video to dvd, and much more. when you install roxio creator for the first time, the roxio installer cd will install ecdc2 on the c: drive. if you installed it on a different drive, the roxio installer cd can't access that drive. instead, it installs ecdc2 on the drive you just installed roxio creator on.
