1.51 MB (1586921 bytes) You will need Service Pack 2 on this Microsoft Flight Simulator X Standard/Deluxe. Activation has not been tested ... GSX V2.4 ground ... as far as I know, it does not enter the game. In the screenshot, it seems that it "does not enter" other programs either. That is, at least some of the functions of the game only work in the air. GSX V2.8 ground ...only in the air. The game has the ability to "fly away" from an aircraft carrier on a "light" aircraft. But, apparently, only in flight! GSX V2.6 ground ...only in the air. And then, in the screenshot there is an opportunity to "fly away" from an aircraft carrier in a light aircraft. So I don't know how it "works" at other levels.
