Password generation is completely random. No one can guess it. This program is best to generate passwords for websites and ID cards. luckyBackup is a very interesting application. it's backed up everything you have that you want to keep safe.the speed is faster than normal backup.plus,it's very easy to use. Publisher's Description luckyBackup is a small yet powerful application designed to provide a simple and efficient method for synchronizing and backing up all important files and folders to a safer location from where you can easily access them in case you encounter issues. The tool doesn't require any installation setup so that it can be copied to a USB flash drive and used on any computer. l luckyBackup offers only two tasks, synchronization and back up, each coming with individual settings. Backing up process requires a proper name, it can represent the general content of the directories, and a source and destination locations, which can't be identical. If you don't want to complicate yourself, you can use the simple mode to quickly save the data, or modify additional settings from the advanced tab. Ther you can enter a description, exclude specific categories (temporary files, trash, system folders), use a particular remote host, as well as disable command elements. Check detailed logs and schedule automatic tasks The jobs are shown in the list from where you can mark the desired ones and hit the run button. The process time might vary depending on how powerful your system is. Once finished, a log record is generated with all the errors found and the status of the operation. The app registers every command and action you make while using the tool and it's displayed at the bottom of the screen. The sync process applies the same steps as the backup. Plus, the program lets you schedule automatic jobs, by specifying the profile, the time and date interval, and if you want to reboot after completion. From the settings, you can disable the user and actions panel and lock the toolbar. In conclusion The bottom line is that luckyBackup is a reliable and intuitive application that comes in handy for everyone who wants to easily back up their valuable data and synchronize particular files and folders. Thanks to its portable nature it can be used on any computer. What's new in this version:
