Adobe released the newest version of the photoshop.com desktop version in October 2018. New features include the ability to take full advantage of a new feature of clean, white design with logos and other elements where no color goes over certain pixels on a flat, design-friendly background. New brushes can be easily made by fading along "smart modes" – the automatic styles that make shapes and fonts look more dynamic. There are also some handy fixing, sharpening, and other tools. If you have a few subsequent events within a particular time window, there are apps to help you. Take Google Drive, for instance. Its latest upgrade allows you to navigate easily through your calendar, and even make reservations and order food online. If you need a way to store all this information, Google Drive is the easiest way to do it. And the new version supports a basic address book too. "In the past, for example, I was using Google Docs every day," says Tapestry, a company that helps individuals and organisations connect with one another and manage their lives. But with Google Docs, Google was always part of the equation and the version Google Drive app puts the user in complete control. And Adobe has extended social media functionality in Photoshop Touch. Photoshop Touch can now tweet, Facebook and Google+ it has been updated to include these features and now Facebook can even be used over cellular networks. Also included is web content that can be cut & pasted directly into images from a web browser with the use of the touchscreen. Combined with Facebook it is a powerful creative tool that is fun and easy to use. It's not a replacement of Photoshop.

Also, I've been a fan of the k2 since I started to learn iPhoneography and photography. It's not as much about features, but more about the value of those features. The camera itself is an excellent one with an excellent camera. I personaly hate Lightroom and Apple products. You can judge from my vids. I usually use Lightroom to share my workflow with friends so they really like it. I also share my workflow with cameras that I donated. Hello, I'm an intermediate photographer. I bought the first Nikon d one, and even bought the Nikon d 900 which is my daily camera.
I would like to get started on my own and learn how to use Lightroom and Photoshop. Photoshop CC 2019 CR2 includes:

Then the GPU applies the optical flow to a GPU-accelerated display surface, so you can render layers containing text with the optical surface your text appears on without sacrificing frame-rate. Gary Heberlein, senior vice president of product management at Adobe, said, "Adobe Photoshop Elements continues to be the world's most popular image editing application. But while at MAX, we've driven a deep, strategic shift, bringing customer experience to a new level in the way we integrate and deliver the best creative experience for a broad range of customers who are less technology-savvy than the typical amateur. This shift is in every part of Photoshop; Photoshop Elements is no exception. Adobe Sensei, the AI platform behind the new Select by Color feature, gives us a new, game-changing power to intelligently identify and include, exclude and replace objects in images. Importantly, these improvements are also available in Photoshop, and all users will immediately benefit from the exciting new capabilities. Adobe Photoshop Suite will be powered by a new engine across all products."
