Adobe Photoshop Elements 2019.2 Professional features all the same enhancements as the Elements versions of years past. The latest version of Photoshop Elements 2019.2 Professional is available in an update to the old.2.0 version addition. But it comes with a couple of other features that you won't find in any other part of the Creative Cloud suite. For example this

older version of Elements includes a SnapBridge function that allows you to transfer images from your smartphone to a local folder on your hard drive. Another refreshing feature is the new Effects panel. It's an improved version of the traditional Elements panel with lots of new effects, such as Gaussian Blur, Red Eye Fix, Frame Color Adjust, and more. There are also nine new tools. These include Content Aware and Shape Layers. As a monthly user of Lr for years (I'm self-employed, so no need for the occasional subscription service), I am 100% happy with the last 2 versions of Elements, and what they offer for those of us who feel like they are the software equivalent of a MAC vs. PC debate. I am as much of a PC guy as I am a MAC guy. Having the option of getting all of my software from the one source was one of the things I liked the most about PC vs. MAC debate. For an entry level user for example, I feel like the amount of choices between Elements and Lr is much lower than it is between say Adobe Lightroom CC and Lightroom Classic. So Elements is a perfect fit for me. Version 20 of the powerful photo program Adobe Photoshop Elements provides more visual choices with streamlined menus, editing options, and the addition of the new Content-Aware Move tool to speed up the editing process.
